

Current Problems

CHARGED FEE

Unlike other platforms that deduct up to 30% from freelancers that are struggling to meet some related expenses, while on LibertyLance both client and freelancer pay only 2% each!

CENTRAL CONTROL

Traditional platforms have a centralized authority that places the power in the hands of a few people with little clarity as to how decisions are made.

PAYMENT ISSUES

Payment withdrawal in some platforms can take up to 2 weeks. On LibertyLance as soon as client is satisfied with the work funds will be instantly transferred through smart contracts to the freelancer.

UNDESERVING REVIEWS

Freelancers have to burn extra fuels to meet up with deadlines or else they get an undeserving review after all the hard work they had put in and ultimately an adverse effect on their earnings and rankings.

Our Solutions

Decentralized

LibertyLance opens up its entire operation to its community by using the blockchain to provide a trustless marketplace so that freelancers and clients do not suffer from unfair disputes because the entire infrastructure is designed to be automated and decentralised to the fullest possible extent.

Smart Contracts

In order to eliminate the services of a middlemen smart contracts that are going to act as an escrow medium are going to be deployed with pre defined conditions and rules to facilitate a smooth transaction between the client and freelancer.

Dispute Resolution

Conflict resolution on LibertyLance is carried out using a core platform architecture that ensures neither party get any payment problems or undeserved reviews. If either party is unsatisfied, an independent panel of LTN token holders will deliver a verdict on the matter while being rewarded for their participation.

Token Usage

Token Holder Jury

In a scenario where any dispute arises, the voting decision system has been setup to cater for this. It is an automatic dispute resolution process that is used to settle disputes between clients and freelancers with a transparent and decentralized approach.

In order to participate in these disputes those with our LTN tokens will be able to vote in the disputed cases as there won't be any involvement of a third party.

Marketplace Access

Any user can register on our platform without any costs but access to features and functionalities will be restricted to the freelancers as they must have a minimum number of LTN tokens in their account wallet in order to unlock the features of the platform. This is done in order to remove any bad actors from the marketplace and to ensure the long term growth and stability of the platform.

Freelance Market Stats

- Freelancers earned an estimated \$1 trillion in 2016
- 69% of freelancers said technology has made it easier to find freelance work
- 77% of freelancers say the best days are yet ahead for freelancing
- There are 53 million people doing freelance work in the US – 34% of the national workforce
- In 2013, the number of businesses hiring freelancers online increased 46%
- People who freelance contribute an estimated \$715 billion in freelance earnings to US
- Earning extra money (but not financial necessity) and schedule flexibility are the top
